(54) Title: OPTICAL INTERCONNECT MODULE, AND FERRULE COMPRISING SAME

(54) Titre : MODULE D'INTERCONNEXION OPTIQUE, ET FERULE COMPORTANT UN TEL MODULE

(57) Abstract: To produce an optical interconnect, either between two optical fibers, or between an optical fiber and an optoelectronic conversion circuit, a module comprising a body (2) wherein are overmoulded optical fiber sections (3) is provided. The overmoulding enables to simplify industrial production and provide the optical fiber sections with shapes, in particular end flares (16, 17) and/or lenses (18, 19) enabling useful refocusing of the light rays transported by said optical fibers.

(57) Abrégé : Pour réaliser une interconnexion optique, soit de deux fibres optiques entre elles, soit d'une fibre optique avec un circuit optoélectronique de conversion, on prévoit un module muni d'un corps (2) dans lequel sont surmoulés des tronçons (3) de fibres optiques. Le surmoulage permet d'une part une simplification de la fabrication industrielle et permet d'autre part d'adopter pour les tronçons de fibres optiques des formes, notamment des évasements (16, 17) et ou des lentilles (18, 19) permettant une refocalisation utile des rayons lumineux transportés par ces fibres optiques.

* Special categories of cited documents :

- *A* document defining the general state of the art which is not considered to be of particular relevance
- *E* earlier document but published on or after the International filing date
- *L* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- *O* document referring to an oral disclosure, use, exhibition or other means
- *P* document published prior to the international filing date but later than the priority date claimed

- *T* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- *X* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- *Y* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- *G* document member of the same patent family
